

CHAPTER 5

CONCLUSION AND FUTURE ENHANCEMENTS

The Tourism management system is helpful to perform all paperless and manage all data efficiently. It provides easy, accurate, unambiguous and faster data access. There is an effective communication between admin, agents and tourists. With the help of this system user can get regular and prompt availability of packages updates.

The project can be enhanced by adding seat selecting facility and messaging system for tourists about the complete information of their booking and by making mailing system.
